The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 30-38, are rejected under 35 U.S.C. 102(e) as being unpatentable by U.
- S. Patent No. 6,927,178 (Kim et al., hereinafter referred to as Kim).

Kim, in col 7, lines 36-38, and lines 47-58, in col 11, lines 66-67, in col 12, lines 1-6, and lines 28-35, discloses a method of eliminating (reducing) photoresist poisoning in a high activation energy photoresist (chemically amplified resist, UV-5 Shipley resist, produces acid upon exposure to energy sources) by controlling the composition of the dielectric ARC (underlying the photoresist, underlying substrate) by plasma treating the dielectric ARC (DARC) with a hydrogen containing plasma or a helium containing plasma prior to the deposition of the high activation energy photoresist on the DARC(claims 30, and 32). Kim, in col 6, lines 50-67, in col 7, lines 51-58, discloses that the plasma is generated using an RF power source that can be provided at more than one frequency (between 1kHz and about 10 GHz) (claim 31). Kim, in col 7, lines 47-64, and in col 13, lines 17-21, discloses that the dielectric ARC is either an inorganic

Art Unit: 1756

silicon-containing DARC or an organic DARC that is plasma treated using either a hydrogen or a helium-containing plasma (claims 33-38).

Response to Arguments

- 3. Applicant's arguments filed May 24, 2006, have been fully considered but they are not persuasive. The 102 rejection made in the previous office action (paper no. 0118) is maintained.
- A) Applicants argue that U. S. Patent 6,927,178 (Kim et al.) reference is not prior art to the present invention because the filing date of Kim et al., is December 10, 2003, which is after the filing date of the present application i.e., November 28, 2003.

The prior art relied upon has an effective filing date of December 13, 2002 which is prior to the effective filing date of the present application i.e., November 28, 2003. Hence Kim et al., is a prior art to the present invention.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Application/Control Number: 10/724,454

Art Unit: 1756

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daborah Chacko-Davis whose telephone number is (571) 272-1380. The examiner can normally be reached on M-F 9:30 - 6:00. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark F Huff can be reached on (571) 272-1385. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
